

AUNG TICIA

Stone Mountain, GA 30083 | (C) 404-395-3627 | aungticia@gmail.com | www.aungticia.com

Summary

Having completed the **Application Development - Java Intensive - Infosys** training through **Woz-U** and receiving the certificate of completion. This program focused mainly on **Java, Java frameworks** such as Spring-boot, Database Cloud, Web Development and Computer Science Fundamentals. In addition, I completed the **Junior Full Stack Java Developer** training course with **Generation USA**, which provided me with proficiency in **Full Stack Web Development** technologies, a developer's mindset, and personal behavioral skills. I also completed the **treehouse Techdegree JavaScript Full Stack** course, delving into both front-end and back-end web development. Through the structured, project-based curriculum of the Full Stack JavaScript Techdegree, I successfully built **10 real-world projects**, further enriching my skill set and practical experience. Strong problem-solving and critical thinking skills across a broad range of work areas. Ability to demonstrate **JavaScript Web development** for back-end and front-end applications. Coordinates ground-up planning, software development, and implementation of core modules.

Skills

- Version Control Systems: **Git, GitHub**
- Front-End Programming: **HTML5, CSS3, JavaScript, React, Angular**
- Back-End Programming: **Java, Spring-Boot, Express, Node**
- Databases: **SQL Server, MySQL, SQLite, PostgreSQL**
- **Proficient in Google Slides, Docs, Sheets, and PowerPoint**
